

# Built for team collaboration anywhere they work

Surface Hub 2S offers innovative technology for bringing remote teams together, with all-in-one digital whiteboarding, a meetings platform, and collaborative computing.

A new hybrid working model is emerging where some employees will continue to work remotely, some in the office, and some will need to adjust to a mix of the two. Surface Hub 2S transcends physical boundaries, bringing teams together and dissolving boundaries between in-office and remote workers.

Surface Hub 2S is a fully interoperable Windows 10 device designed to empower teams to collaborate whenever and wherever inspiration strikes. Participants feel more engaged as meetings come to life with 4K camera resolution, far-field mics, crystal-clear speakers, and best-in-class graphics performance.

In Sweden, Burlöv Municipality's Surface Hub 2S deployment has transformed meetings. Now everyone feels like they have a seat at the table, teams are brought together, and innovative, seamless collaboration encourages creativity and productivity.

“Cooperation will become even more important in the future. I see great opportunities with Surface Hub 2S. Communication becomes both easier and more fun.”

Charlotte Tapper,  
IT Strategist and Manager,  
Burlöv Municipality

## The foundation of a modern hybrid work environment

### Flexible

From small-group brainstorming to big-team meetings, easily configure the perfect meeting space with a persistent, collaborative digital canvas you can share across devices. For a personal desktop experience, configure your Surface Hub 2S with Windows 10 Pro or Enterprise. [Learn about Windows OS options on Surface Hub 2S here.](#)

### Highly secure

Whether in the enterprise or in the small office, Surface Hub 2S features the Windows 10 security features you expect that begin the moment you turn on your device. And in larger organizations, Intune can maintain highly secure, centralized operation and control of every deployed Surface Hub 2S.

### Inclusive

Accessible meetings help build relationships, strengthen teams, and sustain company culture and values. Surface Hub 2S can bring people together and develop natural, human connections in virtual and physical spaces that are both functional and flexible.

## Collaborate better together from anywhere

### NCC

NCC is a leading Swedish construction company that was looking to build a new, more modern workplace designed from the ground up to support teamwork. NCC chose Surface Hub 2S devices as its collaboration tool and Microsoft 365 as the platform.

“We searched for tools that allow us to be efficient and to reach the feeling of teamwork on-premises as well as digitally. One great thing about Surface Hub is that it really makes our meetings more inclusive.”

Catharina Jogården,  
Business Transformation Manager,  
NCC

## A flexible response to challenging times

### NHS CNTW Foundation Trust

One of England’s largest mental health and disability trusts, Cumbria, Northumberland, Tyne and Wear NHS Foundation Trust installed Surface Hub 2S as all-in-one digital whiteboards in a number of locations and hospital wards, helping teams keep in contact with frontline services.

“The main impact of collaboration between Teams and Surface Hub during COVID-19 is just the ability for staff to carry on working—providing amazing care to the patients at the standard they are used to.”

Revell Cornell,  
Infrastructure Manager, Cumbria, Northumberland,  
Tyne and Wear NHS Foundation Trust

## No-compromise creativity and productivity

### Abu Dhabi Department of Culture and Tourism

The Abu Dhabi Department of Culture and Tourism deployed 50 Surface Hub 2S devices to help improve collaboration and spark staff creativity. The new technology also makes it easy for users to capture their brainstorm sessions, making team meetings more efficient and productive.

“Microsoft technologies have changed the way we work, think, and collaborate. I don’t think people will ever want to go back. We’ve removed the compromise from collaboration.”

Peter Jamieson,  
CTO & Director of Digital Transformation,  
Abu Dhabi Department of Culture and Tourism

## A reimagined learning environment

### Morsani College of Medicine, University of South Florida

The new College of Medicine facility in downtown Tampa partnered with Microsoft and Steelcase to create the first Microsoft School of Innovation, complete with 35 Surface Hub 2S devices and modular learning environments connecting students and professors across campus.

“We pulled the technology into the room and used Surface Hub 2S to really build a platform that could move throughout the building.”

Jason Hair,  
Senior Director of Infrastructure and Operations,  
Morsani College of Medicine, University of South Florida
